

RENATA WALKER

Staff Product Manager | Platform Strategy, 0-to-1 Product Development, Cross-Functional Leadership

Montreal, Canada | +1 514 963 2306 | renata.walkerj@gmail.com | [linkedin](#) | [portfolio](#)

SUMMARY

Staff Product Manager with 6+ years driving platform strategy and 0-to-1 products across enterprise AI and SaaS. I help organizations scale through complex platform migrations and multi-product roadmaps, consolidating legacy architectures at Sama, advising automotive AI leaders like Bosch, ZF, and Cariad, and building prioritization frameworks that eliminated speculative work while protecting revenue-critical launches.

EXPERIENCE

Career Break (Sabbatical) – Traveler – World

Aug 2025 – Present

- Exploring the world and myself: 17 countries, 3 Vipassana retreats, and a lot of Claude Code.
- Leading platform redesign and migration for a 30-year family business, directing technical architecture and implementation across 3 legacy systems with projected 10x ROI.
- Built and shipped an AI-powered job application system end-to-end (Python/Supabase), automating candidate matching, scoring, and preparation workflows.

Sama – Staff Product Manager – Montreal, Canada / Remote

Aug 2023 – Aug 2025

- Defined multi-year product vision across 3D, unified platform architecture, GenAI/Categorization, and quality, aligning engineering, sales, and delivery teams on strategic product roadmap priorities.
- Drove the Objects platform migration with lead architects and engineering managers, the org's most complex cross-product initiative, migrating legacy clients, including Walmart, to unified architecture.
- Scoped Sama's Categorization product line (structured labelling for large catalogues) and handed it off to a newly onboarded PM, who took it to launch, landing Instacart and Mirakl as clients and a 5x efficiency gain.
- Hired, onboarded, and managed a product manager, and supported a second PM through a company restructuring without losing team momentum.
- Built company-wide prioritization framework that eliminated speculative builds without delaying any revenue-critical launch.

Sama – Senior Product Manager – Montreal, Canada / Remote

Apr 2021 – Aug 2023

- Led 3D product line from 0-to-1 discovery through delivery, scaling it to 45% of total platform revenue (\$7M) within 3 quarters.
- Advised Bosch, ZF, and Cariad as strategic partner, running on-site workshops that reshaped vendor AI training-data strategies and unlocked several contract expansions.
- Represented the company at 10+ industry conferences as a recognized voice on AI training-data quality.

Coveo – Product Manager, Platform (Enterprise Search) – Montreal, Canada

Mar 2020 – Apr 2021

- Owned API connectivity for data ingestion, implementing native connectors and REST API integration gates that expanded sellable product portfolio and reduced custom-build costs.
- Introduced Coveo's first usage-analytics practice (Amplitude) and redesigned self-serve onboarding, cutting time-to-value from days to minutes.

Breather – Product Manager – Montreal, Canada

Nov 2019 – Feb 2020

- Led Growth & Discovery squad, building UX roadmap prioritized by growth yield to drive improvements across acquisition and retention funnels.

Breather – Business Intelligence Analyst – Montreal, Canada

Nov 2018 – Nov 2019

- Built company's first attribution model connecting user behaviour to marketing spend, uncovering \$600K in wasted ad budget.

Mindgeek – SEO and Data Analysis – Montreal, Canada

Nov 2017 – Nov 2018

- Built Python automation that processed 4,500+ JSON files for speed performance reporting, saving 10 hours weekly. Designed reusable Power Query/DAX data models and 20+ Data Studio dashboards that scaled reporting across the team.

Earlier roles

2016 – 2017

- Digital marketing and finance roles across KPMG, Patagonia, a family business and an agency.
